

PREVENTING ILLNESS IN THE OFFICE

Spreading sickness at work is easy and costly, often setting off a negative chain of events that can impact the health of coworkers, companies, and the economy.

ANNUAL COST of Illness at Work

\$225.8

Billion
Annual cost of productivity losses related to health problems ¹

\$8

Million
In lost productivity due to employee absenteeism ²

HAND HYGIENE ALERT Germ Hotspots

Elevator Buttons

Essential for the day's coming and going, watch out for the lobby button in particular

Door Handles

One of the first things that employees have to touch after the morning commute, going out to lunch, or visiting the washroom

Break Room Appliances

Refrigerator, water cooler, faucet, and microwave – touched by countless employees, and their food

Conference Room Tables

Not only touched by hands, but employees' possessions: pens, computers, notebooks, and dirty tissues

Desk

When was the last time you wiped off your desk?
When was the last time you saw your coworkers wiping off theirs?

TIPS for a Healthy Office

Frequently wash your hands for 20 seconds

with soap and running water, particularly after using the restroom or visiting the break room

Dry thoroughly

with a disposable paper towel

Cover your coughs and sneezes

Wipe off your desk, phone and computer

Stay home when you are sick

to prevent the spread of illness

Sanitize when hands aren't visibly dirty
